

Drs. Ryan and Oniboni will no longer be providing inpatient care at Butler Health System as of Tuesday, November 4, 2014.

The resources and time needed to deal with the new requirements for inpatient care have become too burdensome for us to handle. Electronic medical records and regulatory guidelines have interfered with our ability to provide quality care at both the hospital and the office.

Butler Health System has had a Hospitalist program for the last 6 years which provides a seamless delivery of care from hospital admission through your follow up appointment with us. We will be in direct contact with the Hospitalists and Specialists who care for you during your hospitalization. Your testing is accessible through our electronic health records as well as Butler Health System.

We will continue to serve your medical needs in this ever changing environment. We are available 24/7 in the office and through our answering service at 724/352-8840 to answer any questions.

THANK YOU FOR YOUR UNDERSTANDING
